

What is MicroNanoSpain?

MicroNanoSpain is the Spanish Chips Competence Center dedicated to Microelectronics, within the framework of the European Chips Act. Its mission is to strengthen the Spanish semiconductor ecosystem by connecting research, design, manufacturing and training capabilities with industry.

**SPANISH CHIPS
COMPETENCE CENTER
FOR MICROELECTRONICS**

The MicroNanoSpain project has received funding from the Chips Joint Undertaking (CHIPS JU) under grant agreement No 101217813, with support from the European Union and national funding from the Ministerio para la Transformación Digital y de la Función Pública under Grant N° CJU-010100-2025-5

Pillars of Action

Capabilities

Access to semiconductor design and manufacturing capabilities in Spain and Europe. Connection to pilot lines and design platform.

Training

Access to training in areas such as RISC V, Photonics, Quantum and other microelectronic technologies, from Vocational Training to official certifications.

Entrepreneurship

Support for startups through a Venture Builder, Pledge Fund and Open Innovation Lab, along with other knowledge transfer programs.

Services to boost the ecosystem

Access service to design and manufacturing resources

Technical advisory and consulting services

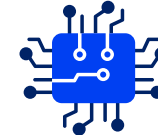

Training and job search services

Support services for entrepreneurship and innovation

Access to financing services and consortia

Business support services
